Experience

Research Assistant, Lehigh University, Bethlehem, PA   May 2012-Present
- Develop Android and Web applications for autistic youths.
- Work individually to design apps that implement sets of requirements.
- Created small web store for distributing apps.
- Designed and implemented REST API for authorization and statistic storage.

Mobile Engineering Intern, Yahoo!, Sunnyvale, CA   Summer 2013
- Worked on a team of 5 developers to create the Yahoo! Weather Android app.
- Implemented all utility screens and fixed issues concerning pull-to-refersh and home screen layout/interaction.
- Treated as full-time employee, participated in daily stand-ups, and worked across teams to solve issues.
- Became very proficient in git, using the company's internal Github instance to work collaboratively and parcitipate in code reviews.
- Won 3rd place at the Y! Intern Hackathon for a Yahoo! Weather Chrome Extension.

Leadership

President, Association for Computing Machinery, Lehigh Chapter May 2013-Present
- Started series of weekly workshops teaching members skills like git, web development, game development, and mobile development, each attracting 40+ people.
- Organized mobiLEHIGH mobile game development competition, sponsored by Microsoft and Google.

Awards

Best Design, HackPrinceton   Fall 2013
- For a gif-managing Chrome extension called Hierogifics.

1st Place and People's Choice, HackPrinceton   Spring 2013
- For the TechCrunch-featured Chrome Extension Tamagetitdone, a productivity-focused digital pet that eats links on your page.

Runner-Up, PennApps   Spring 2013
- For the TechCrunch-featured site SparkTab.net, a task-oriented search bar.
- In the process of an extensive re-write as a Chrome extension.
